3E Consulting Engineers

As part of the redevelopment of a former chemical works at Leeds Road, Huddersfield, GMI carried out a full site remediation, following demolition of the former works.

At a prominent location at the entrance to the Business Park, GMI were contracted by Landmark Development Projects to construct an Audi Dealership to meet the specification of the 'Audi' brand.

The dealership has full servicing and repair facilities, cleaning and pre-delivery bays, together with an impressive showroom and extensive external areas to provide secure storage and pre-owned car sales.

The contract included a full fit-out of all garage equipment, store facilities and an impressive mezzanine office accommodation within the showroom.
